REVENUE DEPARTMENT.

A Dictionary of the Economic Products of India.

By DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first two volumes of this work are now ready for issue, and intending subscribers are invited to register their names with the Superintendent of Government Printing, Calcutta.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses, both chemical and industrial; trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributions have, however, furnished the results of new discoveries, and confirmed the vernacular names; so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal pages; Volume II embraces the letter C in 689 pages; Volume III is in course of preparation, and will contain the letters D, E, F, and G. The whole work will, it is expected, be completed in six volumes by 1891; but a seventh volume may also be issued consisting of an index to all the vernacular and other names contained in the Dictionary; and this as a work of reference, it is hoped, may prove of considerable value.

The price to subscribers will be in India, Rs. 30 and in England 2 guineas, payable in advance, for the complete set. An extra charge for packing and postage will be made for the set—in India, at 8 annas per volume, and for England at 2 rupees 6 annas per volume.

For copies bound in half calf or half morocco, Rs. 6 and 8 shillings respectively will be charged extra for the whole sets.

*.No copies will be issued to non-subscribers till the work is complete, and no single volume will be sold separately. The price to non-subscribers will be Rs. 45 in India, and 3 guineas in England, exclusive of packing and postage.

(e) Regarding the height and mode of construction of buildings.

1. Whenever any old masonry building has been taken down to an extent exceeding one-half of such building, such to be measured in cubic feet, the re-building of the portion thereof shall be deemed to be the erection of a new building, and such portion shall be subject to the regulations of the Act and to the bye-laws respecting new buildings.

2. Every masonry building shall have its outer walls constructed of brick or other hard and incombustible substance, and the foundation shall be the solid ground, or concrete, or other solid substructure on which the footings shall rest.

3. Every person who shall erect a new building shall construct every wall of such building so as to rest upon proper footings. He shall cause the projection at the widest part of the footings of every wall on each side of such wall to be at least equal to one-third of the thickness of such wall at its base, unless an adjoining wall interferes, in which case the projection may be omitted where that wall adjoins. All walls of houses intended to be used as dwelling houses shall have a damp proof course at or above the level of the ground floor.

He shall also cause the diminution of the footings to be in regular offsets, or in one offset at the top of the footings, and he shall cause the height from the bottom of the footings to the base of the wall to be at least equal to two-thirds of the thickness of the wall at its base.

* The two immediately preceding bye-laws which have already been confirmed are:—

5. When loading or unloading goods in streets which admit of the passage of two carts abreast, the cartor shall put his cart alongside of the footpath with one of its wheels touching the curb stone.

6. He shall light his lamp as soon as it becomes dark and obey all reasonable orders of the Police on duty.

4. In the case of any building exceeding one storey in height, every wall shall be properly bonded and solidly put together with mortar, and no part of such wall shall overhang any part underneath it, and all return walls shall be properly bonded together.

All walls and return walls to be bonded together.
This rule is not intended to apply to cornices or mouldings where otherwise admissible.

5. Every wall and every return wall of such building shall be of such thickness as may be considered safe by the Commissioners having regard to the height of the buildings, the materials of which it is constructed, and the purposes to which it will be put; provided that it shall not be lawful for the Commissioners to require more than is required by Appendix I.

Thickness of walls.
6. All beams and girders shall be supported by a sufficient breadth of brickwork, stone or other solid substance to secure the stability of such beam or girder.

Support of beams and girders.
7. The roof of all buildings shall be externally covered with some incombustible material. Also every gutter shoot or trough in connection with the roof of such building shall also be constructed of incombustible materials.

Roofs, skylights, &c., to be of incombustible material.
8. Every person intending to construct an oil, flour or corky mill or an iron foundry shall, at the time of applying for sanction to the erection thereof under section 236 or 247, distinctly state that the building or hut will be used for that purpose.

9. Any person obtaining approval to build under section 238 or section 247 shall construct the house or hut in accordance with the plan approved of by the Commissioners. No prosecution under this bye-law shall be commenced without the sanction of the Commissioners.

For new huts built in bustees under Section 247.

10. In any bustee when new huts are being added under section 247 to existing ranges or clusters of huts, they shall be so erected as to block up no existing roads or paths, and so as to keep as far as practicable in line with the existing main lines of huts which are to be taken as directing lines. In no case shall the roadway left between two new huts, or between a new hut and an existing hut, be less than nine feet in width.

11. If new ranges of huts are being erected they shall be built in regular lines with a road or path of a minimum breadth of nine feet between every two lines. The direction of the lines will be determined by the Commissioners in accordance with the position of the land, the preference being given to footpaths running due north and south.

12. Any road as above terminating in a *cul de sac* shall have a sufficient space at the end not less than 15 feet in width to enable a conservancy cart to turn round.

13. Such roads shall remain private property, but shall be kept open for the passage of conservancy carts, without thereby conveying any right of property in them to the Municipality.

14. No new huts shall be erected at a greater distance than 100 feet from the nearest part of one of the above roads unless otherwise specially sanctioned by the Commissioners.

15. The space between the walls of any two new huts or of any new hut and any adjacent existing hut or building shall not be less than three feet for ventilation. But this rule will not apply to two or more huts built in continuation and composing one "bari."

17. No new huts shall be erected unless sufficient privies have been provided to allow of at least one privy for common use to every 100 residents.

18. By section 247 every new hut must have a plinth at least two feet above the level of the centre of the nearest public road, but this will not suffice unless the ground on which it stands is also sufficiently raised to admit of surface drainage.

19. Such surface drains may be required by the Commissioners for the drainage of all new huts as the circumstances of the bustee and the position of the nearest sewer may render practicable.

20. When any new drain has to be constructed for the benefit of any hut or huts, the owners of which are tenants-at-will, notice will be served on the owner of the land, and if the drain is constructed by the Commissioners in default, he will be charged with the cost thereof, but if such drain fall into subsequent disrepair after construction, the owner of the hut or huts for whose benefit the drain was constructed shall be charged with the cost of its repair.

21. Every person who re-builds the sides and roof of any hut shall apply to the Commissioners for approval thereof under section 247.

Such external wall shall, where it faces a street of less than 16 feet in width, have between it and the boundary line of the owners' premises an open space of not less than 2 feet in width. At the sides it may be attached to the adjacent premises, but if not so attached at the sides and in every case at the back, it shall have a space of 4 feet along the whole side of the building between it and the boundary line of the owners' premises or between it and the inner edge of the boundary wall, if that boundary line is a wall. And every open space, whether exterior or interior, required by this clause, shall be and be kept free from any erection other than a boundary wall and shall be open to the sky, and shall be and be kept open to access from each end thereof.

4. Every open space or interior court-yard referred to in the above rule shall be raised at least one foot above the level of the nearest street, so as to admit of easy drainage into it.

When a corpse is accompanied by a certificate from a Registrar or Medical Officer, the Sub-Registrar shall file such certificate, and then permit the corpse to be burnt.

3. If the Sub-Registrar has any reason to suspect that death has not resulted from natural causes, he shall send immediate intimation thereof to the nearest police-station, and in the meantime withhold permission to have the corpse burnt. Where there is no reason for such suspicion, the corpse shall be burnt within four hours after its arrival.

4. The Sub-Registrar shall see that no corpse, or portion of a corpse, shall on any account be allowed to be thrown into the river. He shall take particular care that no corpse, or portion of a corpse, except the navel, shall remain without being completely reduced to ashes, or be removed in any other condition. The charge to be made for the burning of a body will be on a scale laid down by the Commissioners.

5. The Sub-Registrar shall submit to the Health Officer a weekly return every Monday of all deaths registered at the ghat. This return shall contain the particulars specified in schedule 11 of Act II (B.C.) of 1888, and shall be accompanied by the certificates granted by the several Registrars or medical men during the week separately arranged in different bundles according to the several wards to which they relate.

6. The Sub-Registrar shall be very careful to see that all the belongings of a corpse, such as clothes, mats, bed and bedding, &c., brought with the corpse, are burnt, and none of the aforesaid things shall on any account be allowed to be removed from the ghat by the Domes or any other person. This prohibition shall not apply to any shawl or other valuable apparel brought with dead bodies.

7. Corpses may be burnt both during the day and night, but the Sub-Registrar in charge of the ghat shall see that the ashes and sweepings

Provided always that no person coming to burn a corpse will be prevented from bringing with him his family priest should he prefer to have the cremation ceremony performed by him. In such a case, however, the party who brings his own priest to the burning-ground shall be bound to allow the Brahmin his usual fee.

17. The contractor shall at all times keep on hand a sufficient supply of fuel and the other necessary articles named in the tariff; should he fail to do so, or neglect, or refuse to supply the same at any hour of day or night, or fail to keep his shop open at all times for the purpose of supplying the same, or use false or short weights, or supply inferior or unsuitable articles or create any disturbance within the limits of the Commissioners' lands, his license shall be cancelled, and he shall be summarily ejected from the land and be further liable to criminal prosecution as a trespasser.

18. Persons coming to the ghât for burning dead bodies shall be bound to purchase all the articles named, and the quantities specified in the tariff, from the contractor. But they will be at

liberty to provide themselves with whatever else they may require for cremation, as also all the articles therein named but in excess of the quantities specified in the tariff, or, when the contractor fails to supply them, from wheresoever they like; and the contractor shall not on any account interfere with persons bringing articles for burning dead bodies from outside.

CORPORATION OF CALCUTTA.

First Publication under section 415, Act II of 1888 of bye-laws passed by the Commissioners in Meeting and awaiting confirmation under section 414.

J Cowie,

Secretary to the Corporation.

Section 412—(d) *The conditions under which persons shall be permitted to drive registered carts.*

7. He* shall give correct information about his own name, age and residence, the name and residence of the owner, the place where the cart is ordinarily kept and such other particulars necessary to establish his own identity and that of the owner of the cart as he may be required by the Registering Officer to state at the time of each half-yearly registration.

8. He must carry with him, when plying for hire, the cart license for the then current half-year, and produce it whenever required for the inspection of all Municipal and Police Officers and the hirer of the cart.

(e) *Regarding the height and mode of construction of buildings.*

1. Whenever any old masonry building has been taken down to an extent exceeding one-half of such building, such to be measured in cubic feet, the re-building of the portion thereof shall be deemed to be the erection of a new building, and such portion shall be subject to the regulations of the Act and to the bye-laws respecting new buildings.

2. Every masonry building shall have its outer walls constructed of brick or other hard and incombustible substance, and the foundation shall be the solid ground, or concrete, or other solid substructure on which the footings shall rest.

3. Every person who shall erect a new building shall construct every wall of such building so as to rest upon proper footings. He shall cause the projection at the widest part of the footings of every wall on each side of such wall to be at least equal to one-third of the thickness of such wall at its base, unless an adjoining wall interferes, in which case the projection may be omitted where that wall adjoins. All walls of houses intended to be used as dwelling houses shall have a damp proof course at or above the level of the ground floor.

He shall also cause the diminution of the footings to be in regular offsets, or in one offset at the top of the footings, and he shall cause the height from the bottom of the footings to the base of the wall to be at least equal to two-thirds of the thickness of the wall at its base.

* The two immediately preceding bye-laws which have already been confirmed are:—

5. When loading or unloading goods in streets which admit of the passage of two carts abreast, the cartor shall rest his cart alongside of the footpath with one of its wheels touching the curb stone.

6. He shall light his lamp as soon as it becomes dark and obey all reasonable orders of the Police on duty.

4. In the case of any building exceeding one storey in height, every wall shall be properly bonded and solidly put together with mortar, and no part of such wall shall overhang any part underneath it, and all return walls shall be properly bonded together.

This rule is not intended to apply to cornices or mouldings where otherwise admissible.

5. Every wall and every return wall of such building shall be of such thickness as may be considered safe by the Commissioners having regard to the height of the buildings, the materials of which it is constructed, and the purposes to which it will be put; provided that it shall not be lawful for the Commissioners to require more than is required by Appendix I.

6. All beams and girders shall be supported by a sufficient breadth of brickwork, stone or other solid substance to secure the stability of such beam or girder.

7. The roof of all buildings shall be externally covered with some incombustible material. Also every gutter shoot or trough in connection with the roof of such building shall also be constructed of incombustible materials.

8. Every person intending to construct an oil, flour or soorky mill or an iron foundry shall, at the time of applying for sanction to the erection thereof under section 236 or 247, distinctly state that the building or hut will be used for that purpose.

9. Any person obtaining approval to build under section 238 or section 247 shall construct the house or hut in accordance with the plan approved of by the Commissioners. No prosecution under this bye-law shall be commenced without the sanction of the Commissioners.

For new huts built in bustees under Section 247.

10. In any bustee when new huts are being added under section 247 to existing ranges or clusters of huts, they shall be so erected as to block up no existing roads or paths, and so as to keep as far as practicable in line with the existing main lines of huts which are to be taken as directing lines. In no case shall the roadway left between two new huts, or between a new hut and an existing hut, be less than nine feet in width.

11. If new ranges of huts are being erected they shall be built in regular lines with a road or path of a minimum breadth of nine feet between every two lines. The direction of the lines will be determined by the Commissioners in accordance with the position of the land, the preference being given to footpaths running due north and south.

12. Any road as above terminating in a cul-de-sac shall have a sufficient space at the end not less than 15 feet in width to enable a conservancy cart to turn round.

13. Such roads shall remain private property, but shall be kept open for the passage of conservancy carts, without thereby conveying any right of property in them to the Municipality.

14. No new huts shall be erected at a greater distance than 100 feet from the nearest part of one of the above roads unless otherwise specially sanctioned by the Commissioners.

15. The space between the walls of any two new huts or of any new hut and any adjacent existing hut or building shall not be less than three feet for ventilation. But this rule will not apply to two or more huts built in continuation and composing one "bari."

16. Every new hut which may be built abutting on a road or footpath, whether public or private, shall be so built as not to project on the road or footpath, and also shall be so constructed as not to allow rain-water from its roof to fall upon or injure the same.

17. No new huts shall be erected unless sufficient privies have been provided to allow of at least one privy for common use to every 100 residents.

18. By section 247 every new hut must have a plinth at least two feet above the level of the centre of the nearest public road, but this will not suffice unless the ground on which it stands is also sufficiently raised to admit of surface drainage.

19. Such surface drains may be required by the Commissioners for the drainage of all new huts as the circumstances of the hutees and the position of the nearest sewer may render practicable.

20. When any new drain has to be constructed for the benefit of any hut or huts, the owners of which are tenants-at-will, notice will be served on the owner of the land, and if the drain is constructed by the Commissioners in default, he will be charged with the cost thereof, but if such drain fall into subsequent disrepair after construction, the owner of the hut or huts for whose benefit the drain was constructed shall be charged with the cost of its repair.

21. Every person who re-builds the sides and roof of any hut shall apply to the Commissioners for approval thereof under section 247.

3. Every such building intended to be used as a dwelling shall be so constructed that the whole of at least one side of every room thereof shall either be an external wall or abut on an interior open space or on a verandah. Such interior open space shall have an area equal to not less than one-fourth of the aggregate floor area of all the rooms abutting thereon, and shall not be in any direction less than 6 feet across. Such external wall shall, where it faces a street of less than 16 feet in width, have between it and the boundary line of the owners' premises an open space of not less than 2 feet in width. At the sides, it may be attached to the adjacent premises, but if not so attached at the sides and in every case at the back, it shall have a space of 4 feet along the whole side of the building between it and the boundary line of the owners' premises or between it and the inner edge of the boundary wall, if that boundary line is a wall. And every open space, whether exterior or interior, required by this clause, shall be and be kept free from any erection other than a boundary wall and shall be open to the sky, and shall be and be kept open to access from each end thereof.

4. Every open space or interior court-yard referred to in the above rule shall be raised at least one foot above the level of the nearest street, so as to admit of easy drainage into it.

6. Every such room shall have a clear superficial area of not less than 80 square feet.

This prohibition shall not apply to any shawl or other valuable apparel brought with dead bodies.

REVENUE DEPARTMENT.

A Dictionary of the Economic Products of India.

By DR. GEO. WATT, C.I.E.

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first two volumes of this work are now ready for issue, and intending subscribers are invited to register their names with the Superintendent of Government Printing, Calcutta.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses, both chemical and industrial; trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributions have, however, furnished the results of new discoveries, and confirmed the vernacular names; so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent investigations and discoveries.

Volume I contains the letters A and B, and consists of 560 pages; Volume II embraces the letter C in 680 pages; Volume III is in course of preparation, and will contain the letters D, E, F, and G. The whole work will, it is expected, be completed in six volumes by 1891; but a seventh volume may also be issued consisting of an index to all the vernacular and other names contained in the Dictionary; and this as a work of reference, it is hoped, may prove of considerable value.

- The price to subscribers will be in India Rs. 30 and in England 3 guineas, payable in advance, for the complete set. An extra charge for packing and postage will be made for the set—in India, at 8 annas per volume, and for England at 2 rupees 6 annas per volume. For copies bound in half calf or half morocco, Rs. 6 and 8 shillings respectively will be charged extra for the whole set.
- *No copies will be issued to non-subscribers till the work is complete, and no single volume will be sold separately. The price to non-subscribers will be Rs. 40 in India, and 5 guineas in England, exclusive of packing and postage.

CORPORATION OF CALCUTTA.

Second Publication under section 415, Act II of 1888 of Bye-laws passed by the Commissioners in Meeting and awaiting confirmation under section 414.

J. Cowie,

Secretary to the Corporation.

Section 412—(d) The conditions under which persons shall be permitted to drive registered carts.

7. He* shall give correct information about his own name, age and residence, the name and residence of the owner, the place where the cart is ordinarily kept and such other particulars necessary to establish his own identity and that of the owner of the cart as he may be required by the Registering Officer to state at the time of each half-yearly registration.

8. He must carry with him, when plying for hire, the cart license for the then current half-year, and produce it whenever required for the inspection of all Municipal and Police Officers and the hirer of the cart.

(e) Regarding the height and mode of construction of buildings.

1. Whenever any old masonry building has been taken down to an extent exceeding one-half of such building, such to be measured in cubic feet, the re-building of the portion thereof shall be deemed to be the erection of a new building, and such portion shall be subject to the regulations of the Act and to the bye-laws respecting new buildings.

2. Every masonry building shall have its outer walls constructed of brick or other hard and incombustible substance, and the foundation shall be the solid ground, or concrete, or other solid substructure on which the footings shall rest.

3. Every person who shall erect a new building shall construct every wall of such building so as to rest upon proper footings. He shall cause the projection at the widest part of the footings of every wall on each side of such wall to be at least equal to one-third of the thickness of such wall at its base, unless an adjoining wall interferes, in which case the projection may be omitted where that wall adjoins. All walls of houses intended to be used as dwelling houses shall have a damp proof course at or above the level of the ground floor.

He shall also cause the diminution of the footings to be in regular offsets, or in one offset at the top of the footings, and he shall cause the height from the bottom of the footings to the base of the wall to be at least equal to two-thirds of the thickness of the wall at its base.

* The two immediately preceding bye-laws which have already been mentioned are:—

5. When loading or unloading goods in streets which admit of the passage of two carts abreast, the driver shall rest his cart alongside of the footpath with one of its wheels touching the curb-stone.

6. He shall light his lamp as soon as it becomes dark and obey all reasonable orders of the Police on duty.

4. In the case of any building exceeding one storey in height, every wall shall be properly bonded and solidly put together with mortar, and no part of such wall shall overhang any part underneath it, and all return walls shall be properly bonded together.

This rule is not intended to apply to cornices or mouldings where otherwise admissible.

5. Every wall and every return wall of such building shall be of such thickness as may be considered safe by the Commissioners having regard to the height of the buildings, the materials of which it is constructed, and the purposes to which it will be put; provided that it shall not be lawful for the Commissioners to require more than is required by Appendix I.

6. All beams and girders shall be supported by a sufficient breadth of brickwork, stone or other solid substance to secure the stability of such beam or girder.

7. The roof of all buildings shall be externally covered with some incombustible material. Also every gutter shoot or trough in connection with the roof of such building shall also be constructed of incombustible materials.

8. Every person intending to construct an oil, flour or soorky mill or an iron foundry shall, at the time of applying for sanction to the erection thereof under section 236 or 247, distinctly state that the building or hut will be used for that purpose.

9. Any person obtaining approval to build under section 238 or section 247 shall construct the house or hut in accordance with the plan approved of by the Commissioners. No prosecution under this bye-law shall be commenced without the sanction of the Commissioners.

For new huts built in bustees under Section 247.

10. In any bustee when new huts are being added under section 247 to existing ranges or clusters of huts, they shall be so erected as to block up no existing roads or paths, and so as to keep as far as practicable in line with the existing main lines of huts which are to be taken as directing lines. In no case shall the roadway left between two new huts, or between a new hut and an existing hut, be less than nine feet in width.

11. If new ranges of huts are being erected they shall be built in regular lines with a road or path of a minimum breadth of nine feet between every two lines. The direction of the lines will be determined by the Commissioners in accordance with the position of the land, the preference being given to footpaths running due north and south.

12. Any road as above terminating in a cul-de-sac shall have a sufficient space at the end not less than 15 feet in width to enable a conservancy cart to turn round.

13. Such roads shall remain private property, but shall be kept open for the passage of conservancy carts, without thereby conveying any right of property in them to the Municipality.

14. No new huts shall be erected at a greater distance than 100 feet from the nearest part of one of the above roads unless otherwise specially sanctioned by the Commissioners.

15. The space between the walls of any two new huts or of any new hut and any adjacent existing hut or building shall not be less than three feet for ventilation. But this rule will not apply to two or more huts built in continuation and composing one "bari."

16. Every new hut which may be built abutting on a road or footpath, whether public or private, shall be so built as not to project on the road or footpath, and also shall be so constructed as not to allow rain-water from its roof to fall upon or injure the same.

FOR BURNING CORPSES AT THE BURNING GHATS.

1. The Sub-Registrar of every municipal burning ghat shall live in the immediate vicinity of the ghat, and shall cause a board, containing his name and official designation, to be placed in some conspicuous portion of his dwelling house.

2. Every corpse brought to a burning-ghât, without being accompanied by a certificate in the form prescribed in section 190, Act II (B.C.) of 1888, shall be examined forthwith by the Sub-Registrar, without touching the corpse, who, upon being satisfied that death has resulted from natural causes, shall enter, without fee, in the register kept for the purpose, the particulars specified in the abovementioned form, every such entry being made in order from the beginning to the end of the book. When a corpse is accompanied by a certificate from a Registrar or Medical Officer, the Sub-Registrar shall file such certificate, and then permit the corpse to be burnt.

3. If the Sub-Registrar has any reason to suspect that death has not resulted from natural causes, he shall send immediate intimation thereof to the nearest police-station, and in the meantime withhold permission to have the corpse burnt. Where there is no reason for such suspicion, the corpse shall be burnt within four hours after its arrival.

4. The Sub-Registrar shall see that no corpse, or portion of a corpse, shall on any account be allowed to be thrown into the river. He shall take particular care that no corpse, or portion of a corpse, except the navel, shall remain without being completely reduced to ashes, or be removed in any other condition. The charge to be made for the burning of a body will be on a scale laid down by the Commissioners.

5. The Sub-Registrar shall submit to the Health Officer a weekly return every Monday of all deaths registered at the ghât. This return shall contain the particulars specified in schedule 11 of Act II (B.C.) of 1888, and shall be accompanied by the certificates granted by the several Registrars or medical men during the week separately arranged in different bundles according to the several wards to which they relate.

6. The Sub-Registrar shall be very careful to see that all the belongings of a corpse, such as clothes, mats, bed and bedding, &c., brought with the corpse, are burnt, and none of the aforesaid things shall on any account be allowed to be removed from the ghât by the Domes or any other person. This prohibition shall not apply to any shawl or other valuable apparel brought with dead bodies.

7. Corpses may be burnt both during the day and night, but the Sub-Registrar in charge of the ghât shall see that the ashes and sweepings are removed daily, and that the burning-ghât is always kept clean.

8. The Sub-Registrar shall allow persons to burn the corpses of their friends and relatives, each according to the rites of his religion, without any interference.

9. No child or fœtus is allowed to be buried on the riverside.

10. The Domes in charge are strictly prohibited to drink spirituous liquors within the burning-ground enclosure, or to be in a drunken state when on duty. The Sub-Registrar shall see that this rule is strictly enforced. He shall also remove from the burning-ghât all persons who are drunk or disorderly.

11. All persons connected with the burning-ghât must be civil and attentive to those, who come there to have dead bodies burnt.

12. All remains of corpses, which have been dissected, as also those upon which a Coroner's

inquest has been held, shall be brought to the ghât in a closed vehicle and burnt at night.

13. The contractor, who supplies the necessaries for burning corpses, shall not be allowed to charge more than the rates specified below.

14. The Brahmin shall not demand any fee, gratuity or reward other than that authorized by the Commissioners for the performance of the necessary religious rites, and it shall be his duty to attend immediately on being sent for at all hours of the day or night, and to officiate as priest and cause the performance of the ceremony, and he shall be considered to be a servant of the Commissioners for the purpose of this rule.

15. The Brahmin shall on no pretence enter within the walled enclosure of the burning-ground, except when called by the relatives of deceased persons to officiate as priest, nor shall he remain therein after his services are completed.

16. Should the Brahmin demand any fee, reward or gratuity of any kind whatever in excess of the fee fixed in the tariff, or enter the enclosure except when sent for, or remain therein after his services have been completed, or after he has been required by the Sub-Registrar or other officer of the Municipality to quit the same, or fail to attend when sent for, he shall be liable to dismissal at the discretion of the Commissioners and to be ejected from the burning-ground. Provided always that no person coming to burn a corpse will be prevented from bringing with him his family priest should he prefer to have the cremation ceremony performed by him. In such a case, however, the party who brings his own priest to the burning-ground shall be bound to allow the Brahmin his usual fee.

17. The contractor shall at all times keep on hand a sufficient supply of fuel and the other necessary articles named in the tariff; should he fail to do so, or neglect, or refuse to supply the same at any hour of day or night, or fail to keep his shop open at all times for the purpose of supplying the same, or use false or short weights, or supply inferior or unsuitable articles or create any disturbance within the limits of the Commissioners' lands, his license shall be cancelled, and he shall be summarily ejected from the land and be further liable to criminal prosecution as a trespasser.

18. Persons coming to the ghât for burning dead bodies shall be bound to purchase all the articles named, and the quantities specified in the tariff, from the contractor. But they will be at liberty to provide themselves with whatever else they may require for cremation, as also all the articles therein named but in excess of the quantities specified in the tariff, or, when the contractor fails to supply them, from whomever they like; and the contractor shall not on any account interfere with persons bringing articles for burning dead bodies from outside.

REVENUE DEPARTMENT.

A Dictionary of the Economic Products of India.

By DR. GEO. WATT, C.I.E.

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first two volumes of this work are now ready for issue, and intending subscribers are invited to register their names with the Superintendent of Government Printing, Calcutta.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses, both chemical and industrial; trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributions have, however, furnished the results of new discoveries, and confirmed the vernacular names; so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 550 royal pages; Volume II embraces the letter C in 589 pages; Volume III is in course of preparation, and will contain the letters D, E, F, and G. The whole work will, it is expected, be completed in six volumes by 1891; but a seventh volume may also be issued consisting of an index to all the vernacular and other names contained in the Dictionary; and this as a work of reference, it is hoped, may prove of considerable value.
